SUMMARY

Building AI-powered platforms, financial systems, and cloud-native applications for the last 5+ years across healthcare, fintech, mortgage, and SaaS domains. Experienced in developing end-to-end solutions using React, Next.js, Node.js, Python, and AWS serverless technologies, with a focus on scalable architectures, business-critical workflows, and modern user experiences. Proven ability to own features from design to deployment, mentor engineers, and deliver products in distributed teams.

SKILLS

Programming Languages
JavaScript | TypeScript | Python

Frameworks & Libraries
React.js | Next.js | Node.js | Express.js | Tailwind CSS | Python | Django

State Management & Architecture
Redux Toolkit | Context API | RESTful Architecture | Serverless Architecture | Event-Driven Systems

API Development & Integrations
REST APIs | GraphQL | OpenAI APIs | Third-Party Integrations | API Gateway

Databases
PostgreSQL | MongoDB | MySQL | Redis

Clouds
Azure, AWS (Amplify Gen 2, AppSync, Cognito, DynamoDB, Lambda, S3, CloudFront, API Gateway, CDK)

DevOps & Testing Coverage
Docker | GitHub Actions | CI/CD | Automated Testing

Version Control & Project MGMT
GitHub | GitLab | Jira | Agile (Scrum)

AI & Automation
OpenAI | DeepAI | Agentic Workflows | AI Integrations | HeyGen | AI-Powered Automation

PROJECTS

Monte Carlo Analytics
Financial analytics platform providing business intelligence, reporting, and operational visibility. Built interactive dashboards, analytics workflows, and data visualization solutions that enabled stakeholders to make informed business decisions across multiple business units.

Navitus
Healthcare platform supporting pharmacy benefit management and provider workflows. Developed customer-facing features, API integrations, reporting capabilities, and cloud-based solutions that enhanced operational efficiency and user experience.

Ehata
Property management and real estate platform designed to streamline property operations, customer engagement, and business workflows.

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Micro1
05/2025 – Present
- Built AI-assisted mortgage workflows using AWS serverless technologies.
- Developed loan analytics and reporting dashboards for operational teams.
- Integrated Encompass APIs to automate data exchange and reporting.
- Created AI-powered training experiences using HeyGen workflows.
- Developed financial management modules supporting loan operations.
- Built backend services with Node.js and Python for workflow automation.
- Mentored engineers through reviews, pairing sessions, and implementation guidance.

Full Stack Software Engineer
Devsorb
01/2024 – 05/2025
- Built fintech applications for asset, liability, and market data management.
- Developed analytics dashboards used for operational reporting.
- Designed Node.js APIs powering reporting and business workflows.
- Integrated external financial data sources into centralized platforms.
- Built client management systems for projects, milestones, and analytics.
- Improved reporting visibility through automated business intelligence tools.
- Contributed to architecture decisions and performance improvements.

Software Engineer
Devsinc
05/2021 – 01/2024
- Built healthcare and enterprise applications using React and Node.js.
- Developed reusable frontend components adopted across projects.
- Created REST APIs supporting reporting and workflow automation.
- Worked with PostgreSQL, MongoDB, and Redis for scalable solutions.
- Contributed to cloud deployments and CI/CD pipelines.
- Collaborated with cross-functional teams on product delivery.
- Supported onboarding and mentoring of junior developers.

EDUCATION

Bachelor of Science in Software Engineering
University of the Punjab
